

Amendments to the Specification:

Please replace the title with the following title:

Method of Manufacturing a Light-Emitting Device

Please amend the paragraph beginning at page 1, line 3 as follows:

CROSS-REFERENCE TO RELATED APPLICATIONS

This application is a divisional application of U.S. Application Serial No. 10/061,018, filed on January 29, 2002, now ~~allowed~~ issued on April 6, 2004 as U.S. Patent No. 6,717,359, which claims the benefit of a foreign priority application filed in Japan on January 29, 2001 as serial no. 2001-019696. This application claims priority to all of these applications, and all of these applications are incorporated by reference.

Please amend the abstract as follows:

There is provided a ~~technique~~ method for ~~obtaining~~ manufacturing a light emitting device in which no copy-in is caused in the case of a ~~method of manufacturing~~ a light emitting device having a glossy cathode. ~~When an~~ An uneven portion is formed on the surface of a cathode which is in contact with an organic layer in a pixel portion, and incident light is reflected in all directions. ~~Further, since an~~ An insulating film having a high light absorption property is formed in a driver circuit portion, and the copy-in becomes invisible to the observer.
